

ETH Student Summer Research Fellowship

- **Time frame**: 1 July – 31 August
- **Application deadline**: 15 December at 13:00 (Central European Time)
- **Eligibility**: Bachelor's and master's students worldwide with an expected graduation date earliest during the spring semester the year after the 2-month fellowship
- **Stipend**: Fellows at ETH Zurich will receive a monthly allowance of about CHF 1.750 to cover housing and living expenses. Travel and visa expenses will be covered as well. Students can claim the travel costs against receipts at the beginning of the programme.
- **Accommodation**: Affordable housing during the research stay will be organised, once a candidate is accepted into the programme. We will also provide information regarding visa applications (where required).
- **The programme**:
 - **Available areas of research**: Data Management & Machine Learning, Information & System Security, Computer Systems, Intelligent Interactive Systems and Physical Computing, Programming Languages & Software Engineering, Theory & Algorithms, Visual Computing
 - **Research experience**: Fellows will pursue a research project that aligns with a chosen area of their interest, as part of a research group in our department. This includes interacting and collaborating with group members
 - **Networking and socializing**: A number of on-site socialising events will help fellows to get to know people outside their respective research groups, including current ETH students at both undergraduate and graduate levels
 - **Switzerland**: Fellows have the opportunity to explore the vibrant culture of Zurich in the summer as well as the beautiful mountainous landscape of Switzerland in their free time
