u okviru predmeta: XML i WEB servisi

organizuje predavanje - mini kurs

Mobile Sensing in Android

Predavač:

**Dr Veljko Pejović, Docent
University of Ljubljana
Faculty of Computer and Information Science, Ljubljana, Slovenia**

Mesto i vreme:

FTN, JUG-102, 7. jun 2019. u 10.15h

Sažetak:

The mini course on Mobile Sensing in Android will consist of two hands-on sessions, each lasting for two hours. The topics covered in the sessions include:

- Session 1: Android Framework, Application structure, Manifest file, Application look and feel, Systems, Managers, Providers, Android Activity, Task back stack, Intents, Concurrency via AsyncTasks, Services.
- Session 2: Programming UI components, Layouts, NotificationManager, Listeners, Sensor sampling, Best practices in sensing.

The mini course will require that students have the Android Studio environment installed and that they have access to an Android mobile phone. Last year Bachelor and Master students are preferred for attending this course.

Prijava na kurs:

Usled praktične orijentisanosti kursa, broj polaznika je ograničen. Prijave su moguće putem linka: [Prijava za kurs](#).

Kandidati čija prijava bude prihvaćena, biće o tome blagovremeno obavešteni. Prednost imaju kandidati koji se prvo prijave.
